**EVOL Advanced Education Unit, The Security Certified Program (SCP's) first ATP-
Authorized Training Partner in Lima, Peru to deliver SCP Certification Training.**

(2/2/2009) – EVOL Advanced Education Unit Announced today that their training center will include the new Security Certified Program certification training in their schedule.

The new Security Certified Program certification training includes in-depth discussion and hands-on exercises suited to meet the needs of today's IT Professionals who are seeking high quality information security training.

The first course in the SCP certification track is Tactical Perimeter Defense (TPD). TPD offers students an intense learning experience on the following IT security topics: Network Defense Fundamentals, Advanced TCP/IP, Routers and Access Control Lists, Designing Firewalls, Implementing IP Security and Virtual Private Networks, Designing and Configuring Intrusion Detection Systems, and Security Wireless Networks. After completing this training, students can attempt the SC0-451 exam for the Security Certified Network Specialist (SCNS) certification.

The second course in the SCP certification track is Strategic Infrastructure Security (SIS). SIS offers students offers student an in-depth hands on training experience in the following IT Security areas: Cryptography and Data Security, Linux Security, Windows Security, Attack Techniques, Security on the Internet and WWW, Performing a Risk Analysis, Creating Security Policies, and Analyzing Signatures, After completion of their SC0-451 exam and SIS training, students can attempt the SC0-471 exam for the Security Certified Network Professional (SCNP) certification.

Warren Peterson, President of the Security Certified Program states, "We are excited to have delivered authorized Security Certified Program certification training. SCP Authorized Training Partners meet and exceed strict requirements for instructional delivery of our courses. SCP ATPs are required to use certified instructors, official SCP curriculum, and are held to the highest quality control standards through continual evaluation."

About SCP

The Security Certified Program (SCP) (www.SecurityCertified.Net) provides real world, hands-on security education that will improve job skills and create more secure organizations. SCP also develops multi-level, vendor neutral, security certifications to go along with their training courses. This enables individuals to validate that they have acquired the necessary job skills. Certifications include the Security Certified Network Specialist (SCNS), Security Certified Network Professional (SCNP) and Security Certified Network Architect (SCNA). Training is available through SCP's global network of authorized training partners. The Security Certified Program, LLC is a privately-held company, based in Illinois, USA. For more information, please visit www.SecurityCertified.Net.
